

IN THE SPECIFICATION

Please amend the specification as follows:

Replace the paragraph on page 9, between lines 1-4 of the specification with the following:

The collimator lens 18 is arranged on the optical axis OA 19 for transforming the first radiation beam 4' into a first substantially collimated beam 20'. Similarly, it transforms the second and third radiation beams 4'', 4''' into a second substantially collimated beam 20'' and a third substantially collimated beam 20''' (not illustrated in Figure 1).
